

Report

**CITIZEN PERCEPTION
SURVEY 2017**

Final Report

January 2018

Leger

CONTEXT AND OBJECTIVES

CONTEXT AND OBJECTIVES

In 2017, the City of Edmonton contracted Leger to conduct a survey of Edmontonians designed to understand perceptions of the City of Edmonton on key measures relating to the quality of life in Edmonton.

This research is aimed at capturing citizen perception based performance measures which feed into the corporate performance reporting to achieve the City's vision for 2040 (*The Way Ahead*). In recent years, Citizen Perception Surveys have been carried out annually to gather data and report on the measures.

The 2017 research was designed to:

- Measure the progress with respect to the key performance measures
- Understand the drivers of the performance measures and provide recommendations about how the measures can be further improved
- Make comparisons with past measures wherever applicable

METHODOLOGY

Data Collection

- 400 telephone interviews were conducted with Edmonton residents. Specifically, 117 from Northwest, 79 from Northeast, 101 from Southeast, and 103 from Southwest.
- Interviews were conducted between November 14th and December 3rd, 2017.

Target Respondents

- The respondents to the survey were Edmontonians, 18 years of age and older who have lived in Edmonton for six months or longer.
- Quotas (by age, gender and city quadrants) were maintained during data collection to minimize the need for data weighting. Leger used the proportions provided by the City (derived from the most recent municipal census) to set these quotas and ensure representativeness.
- The sample design was consistent with past surveys to ensure comparability of the results.

Statistical Reliability

- As a random telephone survey, the margin of error is ± 4.9 percentage points, 19 times out of 20.

Questionnaire Design

- The survey instrument was a combination of open and close ended questions.

Survey Pre-tests

- 15 interviews were pretested before the survey was fully launched.

The pre-tests were conducted to ensure:

- The suitability of the introduction;
- The length of the interview;
- Whether questions are meaningful to respondents; and
- The flow of questioning to yield best results.

No modifications were required in the questionnaire after the pre-tests

Sampling Methodology

The sample was drawn randomly from the most recent residential phone listings of Edmonton and included cell phone sample (especially among the younger urban population, who tend to be hard to reach). The final distribution of interviews achieved is 39% landline and 61% cell phone.

Sample generation, random dialing and call administration were automated using ASDE and VOXCO software.

To minimize low response:

- At least six call attempts to each number;
- Calls made during different parts of the day; and
- Call backs were scheduled and honoured

Coding

- A team of coders were assigned to edit, clean and develop meaningful codes for the answers to open-ended questions.
- Code books from past surveys were used to ensure consistency.
- New codes were created when a specific answer became more prominent.

Quality Control

- All interviewers hired by Leger receive customized training with respect to interview techniques, and in-depth training on our call centre CATI software. Our interviewers also received additional training with respect to this particular survey before proceeding to field.
- Interviewers always work under direct supervision at Leger's facilities.
- Senior project managers monitored interviews throughout the first two days of field to ensure flow, clarity, consistency and comprehension of the survey.
- Phone interviews were monitored throughout the data collection period, with a minimum of 10% of each interviewer's interviews being monitored.
- Project managers monitored the progress of data collection, including call record dispositions such as completed interviews, response rates and refusal rates, as well as metrics such as average questionnaire length.
- All data from open-ended questions were checked by different coders to ensure data were accurate and correctly coded.

Analysis of Findings

- The variances between results and targets have been highlighted.
- Data analysis and cross-tabulation have been conducted using SPSS software.

Telephone vs. Online Survey

In addition to the phone survey conducted by Leger, the City of Edmonton also administered the same survey with the City's Insight Community.

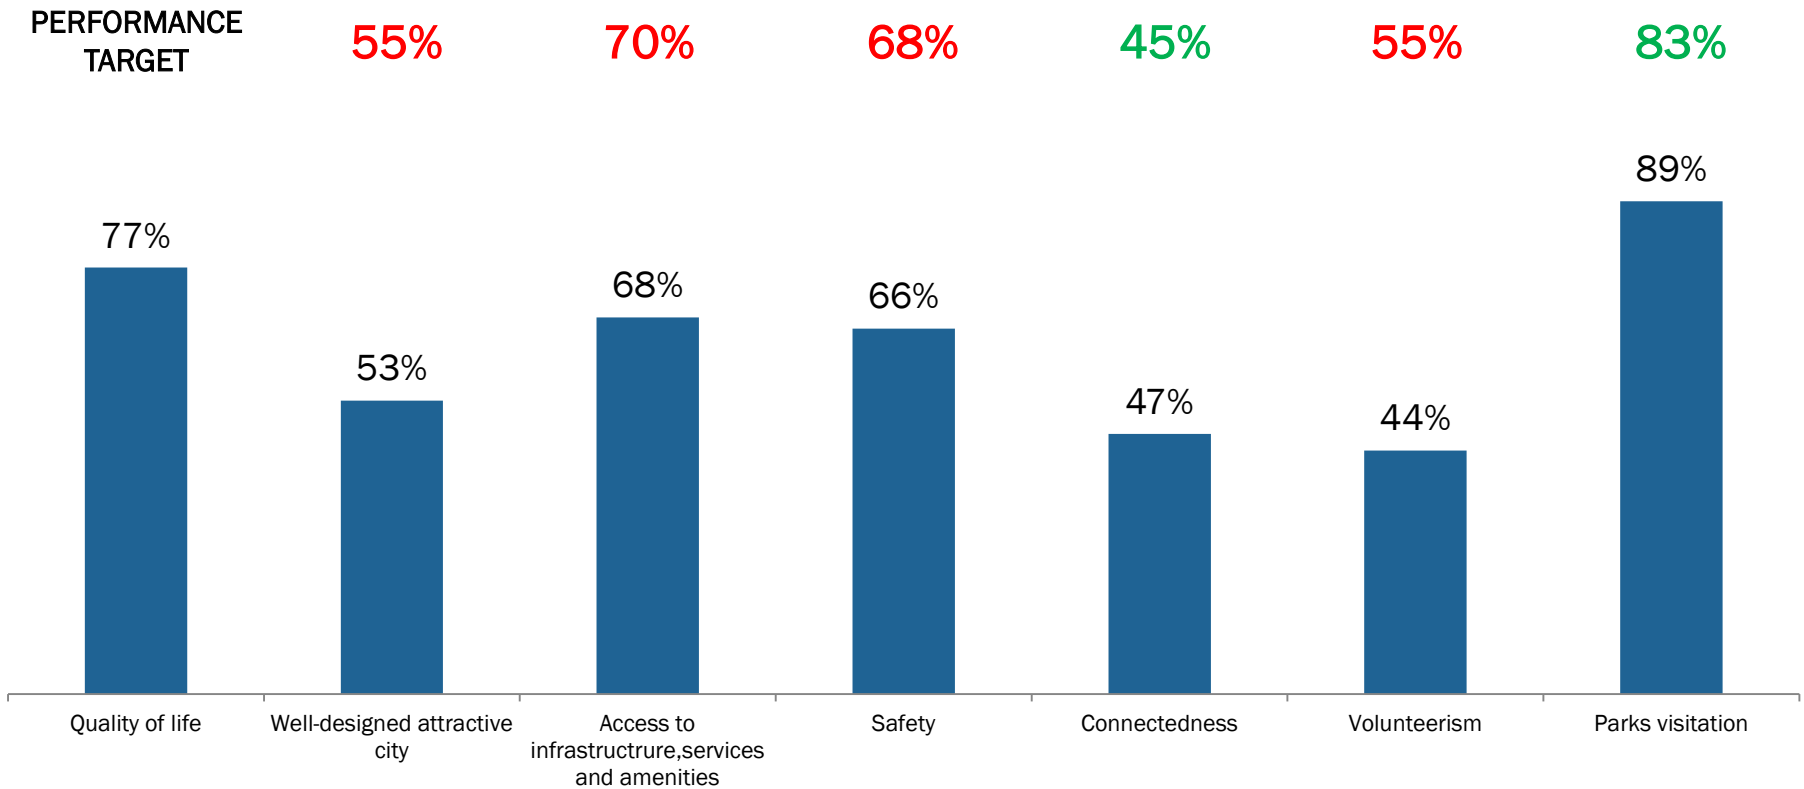

1,568 Edmontonians were surveyed using the City of Edmonton's Insight Community (the data were weighted using the same design as the telephone survey to ensure comparability in terms of the sample distribution).

The analysis and conclusions in this report are primarily focused on the telephone survey. The results of the online survey with the Insight Community are included as a reference.

SUMMARY OF FINDINGS

PERFORMANCE AGAINST TARGETS

2017 - Telephone Survey

SUMMARY OF FINDINGS

2017 - Telephone Survey

OVERALL QUALITY OF LIFE

- Edmontonians (77% 4/5 ratings) feel positive about the quality of life in Edmonton, similar to 2017.
- Similar to previous years, almost four-in-five are satisfied (78% 4/5 ratings) with living in the City of Edmonton.
- The City is also perceived as a great place to live (80% 4/5 ratings) and a great place to work (74%), and to a lesser extent having a diverse economy (62%) and being a great place to invest (54%). The proportion of Edmontonians who agree Edmonton has a diverse economy has increased in 2017.
- The key contributors (the elements that are considered important by Edmontonians to have a good quality of life) to quality of life are:
 - Great place to live
 - Safe
 - Connected
 - Great place to work
 - Well Designed and Attractive
 - Diverse economy
 - Access to infrastructure, services, amenities
 - Great place to invest

SUMMARY OF FINDINGS

2017 - Telephone Survey

CITY DESIGN AND ATTRACTIVENESS

- More than half (53% 4/5 ratings) consider the City to be well-designed and attractive, identical to 2016.
- The City is primarily seen as culturally diverse with lots of desirable well-maintained parks and recreation areas. On the other hand, relatively lower proportions of residents consider the City streets to be well designed and maintained, agreement that the transit system is well designed and attractive is also comparatively lower.
 - For most parameters, perceptions have remained steady, with the exception of agreement that a wide range of housing is available, and that transit system is well-designed and attractive (both have decreased in 2017).
 - The perception that the City is environmentally responsible has returned to 2015 levels following a downward trend from 2014-2016.
- The main drivers of well-designed and attractive city are:
 - Well designed streets
 - Attractive streetscaping
 - Great place to visit
 - Well maintained streets
 - Parks and squares are desirable places to visit
 - Well maintained business districts
 - Transit system is well designed and attractive
 - Great place for entertainment and fun

SUMMARY OF FINDINGS

2017 - Telephone Survey

ACCESS TO INFRASTRUCTURE AND AMENITIES TO IMPROVE QUALITY OF LIFE

- Two-thirds (68% 4/5 ratings) of residents agree that they have access to infrastructure, amenities and services that will improve their quality of life, consistent with 2016.
- Accessible parks, enough libraries, and effective street lighting garner the strongest positive ratings. Nearly all parameters remain consistent with 2016, with the exception of snow clearing services being responsive, which increased.

SAFETY IN THE CITY

- Two-thirds (66% 4/5 ratings) agree that Edmonton is a safe city, identical to 2016 and still slightly lower than the performance target.
 - The significant gap between feelings of safety during the day and during the night is still present. Over two-in-five (44%) feel safe at night overall while the majority (85%) feel safe during the day.
 - The vast majority feel safe in their homes (even though there is a slight downward trend) and neighbourhood (including local neighbourhood parks). However, confidence drops when it comes to river valley parks or walking downtown.
 - The proportion of Edmontonians who feel that prevention is an approach to reduce crime has decreased following an increase in 2016.
- The strongest contributors to feelings of safety are:
 - Feeling safe walking downtown
 - Feeling safe leaving one's residence or property unattended
 - Feeling safe in the neighbourhood parks
 - Feeling safe in one's home
 - Feeling safe walking in one's neighbourhood

SUMMARY OF FINDINGS

2017 - Telephone Survey

CONNECTEDNESS

- Almost half (47% 4/5 ratings) feel connected to their community. Even though this proportion is just above the performance target (45%), it represents a decrease compared to 2016.
- Generally, citizens feel they have access to community facilities and they can get help from their friends / family if required, even though agreement they have access to community facilities shows a slight downward trend since 2015.
- The proportion of Edmontonians who feel that their community is open and welcoming has been trending upwards since 2015.
- Agreement has decreased in 2017 for feeling welcome and socially included, knowing one's neighbours, regular community events, and friends and family living in the same community. About a third (27% 4/5 ratings) are active in their community, which is a lower rating than in 2016.
- The strongest contributors to connectedness are:
 - Active and involved in community
 - Feel welcome and socially included in community
 - Community is friendly and supportive

VOLUNTEERISM

- Over two-in-five (44% 4/5 ratings) have participated in a volunteering activity in the past year, a decrease in 2017.

CITY PARKS VISITATION

- The majority (89%) have used a City Park in the past year – higher than the performance target of 83%, and steady high since 2014.
 - Neighbourhood parks (82%) followed by the river valley parks (64%) are the most commonly visited (consistent with 2016).

OVERALL PERCEPTIONS ABOUT THE CITY

OVERALL QUALITY OF LIFE

2017 - Telephone Survey

"The neighborhood we live in is very safe. we can leave something on the lawn and nothing would be stolen. And the area I live in the people are very nice, there's a lot of companionship."

"It's a good place to raise a family, affordable, safe and jobs available."

Don't know

**Good/Excellent
(4,5 ratings)**

77%

■ 1-Not good at all □ 2 □ 3 □ 4 ■ 5-Excellent

"The bike lanes and roadways are frustrating. Construction is annoying. Economy is not great. House prices seem to go down while our property taxes continue to go up."

"In Edmonton the transit system isn't really all that good. If you don't have a vehicle then you would need to take a bus, but it could take a long amount of time and sometimes even up to 45 minutes to an hour. Also road conditions aren't all that good, there are a lot of pot holes in the city."

Target 2018: **45%** feel connected to their community

"We have an active community board or council and a variety of community building events. We had a neighborhood wine walk last night. So I do feel connected to the people in my community."

"It is wonderful community. It is very community oriented. The community league has lots of activities happening like street hockey, block parties. Halloween festivities. And there is lots of people out walking. Bike lanes. There is always people riding their bikes."

Trend Over Time

Base: Edmontonians (n=400)

"There are not that many community events in my neighborhood, and I've only lived in this neighborhood for a year."

"Because I don't know my neighbors, and I don't find it personable, and there is nothing to engage in the community."

Base: Edmontonians (n=400) * Change in scale in 2014
