

Edmonton's Ecological Network

Legend

-  Core Areas (Regional)
-  Primary Core Areas (Edmonton)
-  Secondary Core Areas (Edmonton)
-  Tablelands Core Areas (Edmonton)
-  Habitat Patch (Natural Area)
-  Corridor
-  Stepping Stone
-  Waterbodies
-  Main Roads
-  City of Edmonton Boundary

Note:

1. Core Areas are habitat patches that contain a sub-population from which species could disperse to adjacent habitat. These vary with species and their area requirements.
2. Core areas indicated here are the largest habitat patches in the City and the adjacent regional lands. Because of their large size, they could support a wide diversity of species.
