## Take Action on Climate Change

## CO<sub>2</sub>RE – Edmonton's Energy Efficiency Resource

CO<sub>2</sub>RE provides valuable expertise and comprehensive "how-to" information on improving home energy efficiency to reduce greenhouse gas (GHG) emissions.

Created by more than 20 local companies, non-profit organizations, institutions and government agencies, CO<sub>2</sub>RE was developed by the Edmonton community, for the community.

CO<sub>2</sub>RE includes strategies to address Industrial, Commercial/Institutional and Residential sectors.

### Goal:

# 2020

Greenhouse gas emissions reduced by **20%** compared to 1990 levels.

### Join CO<sub>2</sub>RE

All Edmontonians are invited to join CO<sub>2</sub>RE. Membership is free and includes expert advice on energy improvements, cost savings and GHG emission reductions. Members receive regular newsletters and special promotional offers and incentives on energy-efficient products and programs. Join CO<sub>2</sub>RE on-line at [www.edmonton.ca/co2re](http://www.edmonton.ca/co2re) or call 311. (Outside Edmonton, call 780-442-5311.)

## Affordable Energy Saving Tips

Reducing climate change starts right at home. Try three top tips from CO<sub>2</sub>RE.

### Install Compact Fluorescent Lights

Replacing six regular 100 watt bulbs with 23 watt compact fluorescent bulbs will reduce your personal greenhouse gas (GHG) emissions by over 2.1 tonnes during the five-year life of the bulbs. It will also save up to \$250 on your power bill or approximately \$50 per year.

### Seal Air Leaks

Using new weatherstripping, caulking and foam gaskets to seal air leaks can save up to \$150 on your gas bill and reduce personal GHG emissions by 700 kg per year.

### Install Programmable Thermostat

Installing a programmable thermostat could save you up to \$120 and reduce your GHG emissions by 500 kg (1/2 tonne) yearly.

*Figures based on an average cost of \$10.00 per gigajoule of natural gas, including GST and related fees.*

## ENERGY STAR® The Energy Efficient Choice

Purchasing ENERGY STAR® rated products can save families up to 30% on their energy bill with similar reductions in greenhouse gas (GHG) emissions, without sacrificing features, style or comfort. When selecting an energy-efficient household appliance, home heating or office equipment, consumer electronics or other products, look for ENERGY STAR®.

ENERGY STAR® is a government-backed program helping businesses and individuals protect the environment through superior energy efficiency choices.
