

## 2012 Rates for Waste Management Services Utility

---

Starting **January 1, 2012**, monthly rates for **single family households** will increase from **\$31.34** to **\$33.20**. The monthly rate for **multi-family units** will increase from **\$20.37** to **\$21.58**.

### Services provided by Waste Management Services:

- » Garbage collection at all residences in the City
- » Blue bag recycling for single family homes
- » Blue bin recycling for apartments and condominiums
- » 22 community recycling depots
- » 3 Eco Stations for convenient drop off of household hazardous waste and other waste
- » 12 Big Bin events to drop off large items at no charge
- » Assisted waste collection for those unable to put out their waste for collection
- » An environmentally responsible waste processing and disposal system. **This includes:**
  - Edmonton Composting Facility that converts organics in your garbage to compost
  - Materials Recovery Facility for sorting recyclables
  - Electronics/electrical appliance recycling
  - Construction and demolition waste recycling
  - Integrated Processing and Transfer Facility to sort and prepare waste for composting and conversion to biofuel
  - Hauling waste that can't be processed to a distant landfill
  - Waste-to-Biofuels facility under construction

Edmonton's waste system is shifting from landfilling to more environmentally responsible processing of waste. The City's goal is to divert 90% of household waste from landfill by 2015.
