## About District Planning

District Planning will modernize our planning system, helping realize The City Plan vision of building a healthy, urban, climate-resilient city where everyone enjoys easy access to amenities and services close to home.

### District Plans will:

- + Show Edmontonians how they can expect their communities to grow and change over time.
- + Guide where development will be encouraged, creating more redevelopment opportunities and directing larger developments to nodes and corridors.
- + Inform infrastructure and service investments needed to support more housing, businesses, amenities and travel options in each district.
- + Create efficiencies by streamlining the number of plans the City must reference when evaluating development proposals, which reduces barriers to housing and businesses and encourages investment.
