The Water and Sewer Servicing Section of Drainage Services has reviewed the proposal and have the following comments.

### **Water and Sewer Service Information**

Plan RN64, Block 35, Lot 2 (11606-122 Street)

#### Proposed Lot 2A, Blk 35

- 1-20mm water service exists off the Lane West of 122 Street at 7.3m North of the South Property Line of Lot 2A.
- 1-150mm sanitary service exists off the Lane West of 122 Street at 31.3m North of Manhole #258590. The location at the main is assumed straight out.

#### Proposed Lot 2B, Blk 35

- Our records indicate that no water and/or sewer services exist directly off city mains.

### **Water and Sewer Servicing Conditions**

1. It is required under the City's Drainage Bylaw and EPCOR Water Standards that **each separately titled parcel must be independently serviced with water and sewer services directly off public mains.** A private water and sewer system cannot cross one separately titled parcel to service another and cannot be used to service more than one separately titled parcel.
2. As per the Drainage Bylaw, no owner shall drain their property in such a manner as to cause or have potential to cause a nuisance, hazard, or damage to their property or to adjacent parcels. Drainage Services will determine and specify the location of release of storm water and subsurface drainage to a sewer service, an overland route, or a specific overflow point on or from the parcel. Each separately titled parcel must drain the storm water and subsurface drainage entirely to its own private drainage system.
3. **New water and sewer services will be required for proposed Lot 2B, Blk 35 directly off city mains prior to subdivision approval.**
4. Construction charges will apply for any new water, sanitary and/or storm services required which will be constructed by the City from the main to the Property Line.

### **General**

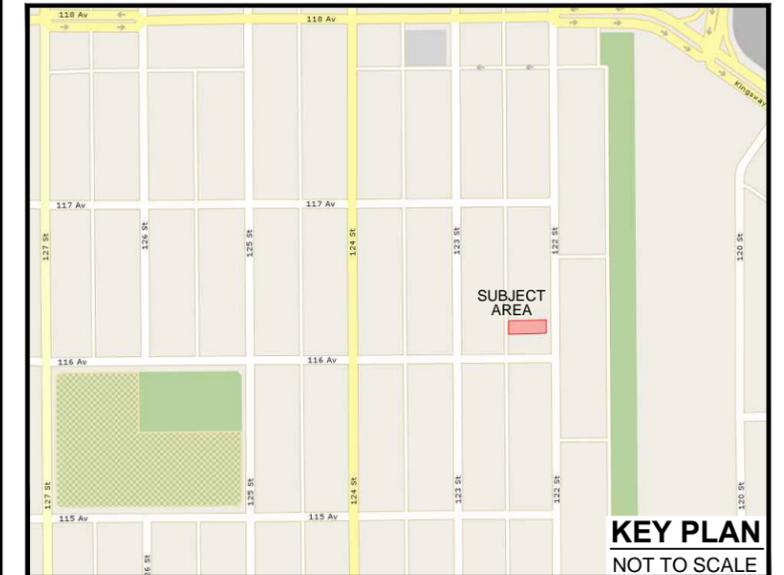

1. Refer to comments from other sections of Drainage Services regarding sewer main locations, capacities and/or mainline extensions.
2. Also, refer to comments from Water Engineering regarding water main locations, capacities and/or mainline extensions.
