

- 1 RAISED PLANTED MEDIAN**
A raised, planted median is provided to serve as a gateway to 124 Street and to direct vehicle traffic around the corner.
- 2 PEDESTRIAN CROSSING**
A marked pedestrian crossing is provided on 124 Street with a push-button activated signal. An advance warning flasher is provided on Jasper Avenue to warn oncoming westbound vehicles.
- 3 BARRIER WALL**
A new barrier wall is provided to protect the south sidewalk from errant vehicles. The wall becomes a raised planter along the south sidewalk with seating and tree planting.
- 4 REALIGNED JASPER AVENUE**
The extension of Jasper Avenue heading west to High Street is re-aligned to remove the existing island and to create a single, right-in/right-out access. The access is raised to sidewalk grade slow traffic and reinforce the pedestrian priority. Additional space to the south is used to create new sidewalks and landscape beds.
- 5 EXISTING ACCESSES**
Existing accesses to businesses and residential buildings are retained where required. Crossings are raised to sidewalk grade to slow traffic.
- 6 SOD BOULEVARD**
South boulevard is simply treated with sod and street tree planting.
