Existing condition of the basketball court area

What we heard	Benefits	Tradeoffs
<ul style="list-style-type: none"> + We heard that residents would like to feel safer while using the parks. They suggested additional lighting and trimming trees to keep sightlines open + We also heard that residents would appreciate more amenities, such as gathering spaces, benches, bike racks, waste bins and picnic tables, that would encourage neighbourhood gatherings + The basketball courts and playgrounds were also noted as needing upgrades 	<ul style="list-style-type: none"> + Wider pathways make it easier for people who walk to move around the park and new planting beds would add greenery to the park + The realigned pathway behind Baturyn Elementary School would prevent conflicts between people walking and driving + Additional lighting would improve visibility for people walking and biking when it is dark and waste bins would help keep the area clean + New seating areas would provide a place for people of all ages to gather and to rest + New fruit trees would provide an additional amenity for the neighbourhood + A new covered picnic shelter would provide an additional recreational amenity* 	<ul style="list-style-type: none"> + Open park space would be lost to accommodate new or widened paths, plantings, gathering spaces, and other amenities + Impacts to some existing sports fields and baseball diamonds for wider paths + The community may be responsible for funding the community-led picnic shelter*

Potential improvements

- | | | |
|--|---|---|
|  New pathway/sidewalk |  Existing bench |  Existing bollards (A bollard is a short post used to prevent vehicles from entering an area) |
|  Widen existing pathway |  New bench | |
|  New concrete pads for benches and picnic tables |  Existing picnic table with replaced concrete pads | |
|  Kid-friendly sidewalk games (i.e. hopscotch) |  New accessible picnic table | |
|  New planting bed |  Additional lighting | |
|  Maintain existing trees |  Relocated existing lighting | |
| |  Relocated existing waste bin | |

What we heard

- + We heard that amenities such as picnic tables, waste bins, benches, lighting and gathering spaces would be welcome additions to the park space
- + We heard that there is interest in additional outdoor recreational activities for all ages and abilities, at all times of the year

Benefits

- + Wider pathways make it easier for people who walk to move around the park
- + A new diagonal pathway would enhance accessibility and connectivity within the park
- + Additional lighting would increase visibility for people walking when it is dark
- + Benches give people a place to rest and meet
- + A new seating area would provide a place for people of all ages to gather and to rest
- + Waste bins help keep the area clean
- + New concrete pads for existing picnic tables and a new accessible picnic table would provide opportunities for recreation in the park
- + New planting beds would add greenery and beauty to the park
- + The realignment of 110A Street allows for more green space
- + Kid-friendly sidewalk imprints/games provide additional outdoor recreational activities

Tradeoffs

- + Open park space would be lost to accommodate the picnic tables, gathering space, widened paths, new paths and other amenities
- + The realignment of 110A Street may result in the loss of some on-street parking in front of the park

Baturyn Focus Areas | Parks | **3. Harry Farmer Park | Option 1**

*Community-led project

What we heard

- + We heard that residents would like to see improvements and upgrades to the outdated parks with new amenities, better lighting, tree trimming for sightlines and additional gathering spaces
- + We also heard that there would be interest in community-led projects such as a potential community garden* and fruit bearing plants
- + We heard there is a desire for missing sidewalk connections to be completed

Benefits

- + A potential community-led garden* and new fruit trees would provide additional amenities and gathering places for the neighbourhood
- + New pathways would enhance accessibility and connectivity within the park
- + Additional lighting would improve visibility for people walking when it is dark
- + Benches give people a place to rest and meet
- + A new seating area would provide a place for people of all ages to gather and to rest
- + Waste bins help keep the area clean
- + An opportunity for community-led public art* could enhance the beauty of the park and provide an opportunity to reflect the history of Harry Farmer

Tradeoffs

- + Enhancements to this park including new pathways, a seating area, a potential community-led garden* and new fruit trees would result in the loss of open green space which may have been used for informal gatherings and play area
- + A maintenance agreement would need to be looked at for the potential community-led garden boxes* and fruit trees cleanup
- + The community may be responsible for the maintenance of the potential community-led garden*

Baturyn Focus Areas | Parks | **3. Harry Farmer Park | Option 2**

- | | |
|--|--|
|  Widen existing pathway |  Existing bench |
|  New pathway |  Maintain existing trees |
|  New concrete pad for existing bench |  New waste bins and dog waste bag station |
|  Additional lighting |  Relocated existing lighting |

*Community-led project

What we heard

- + We heard that an off-leash dog park would be a welcome addition to the neighbourhood

Benefits

- + A new off-leash dog park would provide an additional amenity for the community
- + New pathways would enhance accessibility and connectivity within the park
- + Additional lighting would improve visibility for people walking when it is dark
- + Waste bins help keep the area clean

Tradeoffs

- + Enhancements to this park including a new off-leash dog park would result in the loss of open green space which may have been used for gatherings and play area
- + The privacy fence would result in the loss of direct access and views for homes backing onto the park

Example image of a dog agility course* using natural materials

Baturyn Focus Areas | Parks | **3. Harry Farmer Park | Option 3**

*Community-led project

What we heard

- + The desire for a bike bumps course was not identified by the community
- + We heard that residents would like to see improvements and upgrades to the outdated parks with new amenities
- + We heard that there is a desire for missing sidewalk connections to be completed

Benefits

- + A new community-led bike bumps course* would provide an additional amenity for the community
- + A new pathway would enhance accessibility and connectivity within the park
- + Benches give people a place to rest and meet
- + Additional lighting would improve visibility for people walking when it is dark
- + Waste bins help keep the area clean

Tradeoffs

- + Enhancements to this park including a community-led bike bumps course* would result in the loss of open green space which may have been used for gatherings and play area
