

New Codes timeline revised 1 May2019

(1) The transition period for Code changeover has been extended to end of 30 November 2019 / start of 1 December 2019

(2) You may construct under the 'old' Codes if the building permit application is **accepted*** prior to 1 December 2019

(3) You may design and construct under 'new' Codes from 1 June 2019

(4) You must design and construct under 'new' Codes from 1 December 2019. Contact permit office early to discuss code-in-force for phased multi-building sites

* NOTES:

- “Accepted” is when the submission is deemed complete by the intake screener after the application is received in the permit office
- 'Construction-in-progress' or 'Plans exam-in-progress' does **NOT** normally require that plans be updated to new codes
- NECB2011 to NECB2017 transition path is parallel to the above - NECB2017 is to be used in tandem with NBC2019-AE
