

New Bike Routes and Infrastructure

Map of Current and Future Bike Routes within Central McDougall

Central McDougall has existing bike routes along 104 Street (north to south) and 105 Avenue (east to west).

As part of public engagement, we heard support to:

- Improve connection from Central McDougall to Queen Mary Park (west)
- Link to Grant MacEwan University
- Improve safety along highly-used 108 Avenue

A shared-use path (SUP), is a 3-metre pathway that is separate from traffic and provides a space shared by pedestrians and bicycles. It will be widened from the existing walk towards properties.

The operations of the road remain unchanged and will remain as 2-way traffic with parking on both sides.

Clearing of snow on the shared-use path will become the responsibility of the City of Edmonton.

*Preliminary – subject to funding and approval
