The Water and Sewer Servicing Section of Drainage Services has reviewed the proposal and have the following comments:

Water and Sewer Service Information

Following is the water and sewer servicing information for the proposed re-subdivision parcels:

Proposed Lot 27A, Block 29

- 1-20mm water service and 1-150mm sanitary service exist in common trench on the lane north of 51A Ave at 0.2m east of the west property line of proposed lot 27A.
- 1-100mm storm service exists on 51A Ave at 9.1m west of the east property line of proposed lot 27A.

Proposed Lot 27B, Block 29

Our records indicate that no water and/or sewer services currently exist to the proposed subdivision parcel directly off City mains.

Note: The owner must dig and locate the existing services at property line in order to verify location and submit a survey with ALS stamp to Drainage Services prior to payment for new services.

Water and Sewer Servicing Conditions

1. It is required under the City's Drainage Bylaw and EPCOR Water Standards that each separately titled parcel must be independently serviced with water and sewer services directly off public mains. A private water and sewer system cannot cross one separately titled parcel to service another and cannot be used to service more than one separately titled parcel.
2. As per the Drainage Bylaw, no owner shall drain their property in such a manner as to cause or have potential to cause a nuisance, hazard, or damage to their property or to adjacent parcels. Drainage Services will determine and specify the location of release of storm water and subsurface drainage to a sewer service, an overland route, or a specific overflow point on or from the parcel. Each separately titled parcel must drain the storm water and subsurface drainage entirely to its own private drainage system.
3. **New water, sanitary and storm services will be required for proposed Lot 27B directly off city mains prior to subdivision approval.** Should the survey show that the existing services are not located at the measurements mentioned above, then the lot that does not have water, sanitary and/or storm service will require new services.
4. Construction charges will apply for any new water, sanitary and storm services required which will be constructed by the City.

Water and Sewer Servicing Section
Drainage Services

The Water and Sewer Servicing Section of Drainage Services has reviewed the proposal and have the following comments.

Water and Sewer Service Information

Plan 6900R, Blk 7, Lots 16-17 / 8756 – 84 Avenue

Proposed West Lot

- 1-20mm water service and 1-150mm sanitary service exist off the Lane North of 84 Avenue at 6.4m East of the West Property Line of Lot 5.

Proposed East Lot

- Our records indicate that no water and/or sewer services exist directly off city mains.

Water and Sewer Servicing Conditions

1. It is required under the City's Drainage Bylaw and EPCOR Water Standards that **each separately titled parcel must be independently serviced with water and sewer services directly off public mains.** A private water and sewer system cannot cross one separately titled parcel to service another and cannot be used to service more than one separately titled parcel.
2. As per the Drainage Bylaw, no owner shall drain their property in such a manner as to cause or have potential to cause a nuisance, hazard, or damage to their property or to adjacent parcels. Drainage Services will determine and specify the location of release of storm water and subsurface drainage to a sewer service, an overland route, or a specific overflow point on or from the parcel. Each separately titled parcel must drain the storm water and subsurface drainage entirely to its own private drainage system.
3. **New water and sewer services will be required for the proposed East Lot directly off city mains prior to subdivision approval.**
4. Construction charges will apply for any new water, sanitary and/or storm services required which will be constructed by the City from the main to the Property Line.

General

1. Refer to comments from other sections of Drainage Services regarding sewer main locations, capacities and/or mainline extensions.
2. Also, refer to comments from Water Engineering regarding water main locations, capacities and/or mainline extensions.
