INTRODUCTION

This report has been prepared by the City of Edmonton in accordance with Alberta's [Automated Traffic Enforcement Technology Guideline](#). This report provides all required data and information as specified in Schedule C - Reporting Requirements of the guideline and demonstrates the main guiding principles behind the use of Automated Traffic Enforcement (ATE) in Edmonton. This report also describes the ATE program measures and targets that align with long term transportation safety outcomes as outlined in Section 1, 2.0 - Guiding Principles and Outcomes of the Guideline.

The City of Edmonton is committed to achieving Vision Zero, the internationally recognized goal of zero traffic-related fatalities and serious injuries, through safe and livable streets.

Safe speeds are fundamental to achieving this goal. They give people more time to react, reduce both the frequency and severity of crashes and increase drivers' field of vision. Automated enforcement, including Mobile Speed Enforcement (MSE) and Intersection Safety Devices (ISDs), is an effective and proven way to reduce speeding and plays a key role in supporting safer and more livable streets. Research to investigate the safety impacts of MSE, conducted by the City of Edmonton's Research Chair in Urban Traffic Safety at the University of Alberta, has shown that efficient and effective strategic deployment of MSE reduces both speed and crashes, underscoring the significance of this tool for improving traffic safety.¹

SAFE MOBILITY STRATEGY 2021-2025

2025 marks the final year in implementing the *Safe Mobility Strategy 2021-2025*, which has guided the City's journey towards Vision Zero over the last four years.

The Safe Mobility Strategy sets out deliberate actions to address the systemic factors that contribute to serious crashes, including unsafe speeds. In Edmonton, safe speeds are encouraged through a combination of measures including speed check signs, engineering upgrades, education and awareness campaigns and automated enforcement in coordination with in-person enforcement by the Edmonton Police Service (EPS). Locations for automated enforcement are selected after in-depth traffic analysis and consideration of engineering and design standards.

'Strategic Collaboration with the Edmonton Police Service' is a Key Action in the *Safe Mobility Strategy (2021-2025)*, which includes supporting the strategic location selection and scheduling of both in-person traffic enforcement and City-led automated enforcement.

¹Agina, S., Momeni Rad, F., El-Basyouny, K. Linking Deployment Outcomes to Program Impacts for Mobile Photo Enforcement. *Safety*, 2023, 9, 88. <https://www.mdpi.com/2313-576X/9/4/88>

AUTOMATED TRAFFIC ENFORCEMENT TECHNOLOGY GUIDELINE

In December 2024, the Government of Alberta announced changes to ATE to take effect in 2025. The new Automated Traffic Enforcement Technology Guideline (2025) was released on April 1, 2025. The changes include prohibiting photo radar on all provincial highways, restricting photo radar to school zones, playground zones and construction zones, and limiting ISDs to red light enforcement only.

The City of Edmonton established new processes and made the following changes in practice:

- Speed on Green enforcement at existing ISDs was deactivated as of January 1, 2025.
- ISDs continue to enforce red-light infractions on roadways which are not a provincial highway or connector route, provided that the intersection meets the collision and safety criteria in the Guideline.
 - ISDs on provincial highways and connector routes were removed in Q1 2025.
- MSE at eligible, previously approved sites outside of playground zones (PGZs) was discontinued as of January 31, 2025
- MSE was restricted to playground, school and construction zones as of February 1, 2025. MSE continued to be conducted in PGZs until June 30, 2025.

Timeline of changes related to Automated Traffic Enforcement Technology Guideline and changes with Automated Enforcement implementation in Edmonton.

In accordance with the ATE guidelines (2024 and prior):

- The City of Edmonton collects average daily traffic data during deployment or through automated enforcement equipment or implementation of supplementary equipment where traffic data during deployment was not available.
- Ticket review software ensures only one ticket can be issued to the same vehicle within a five-minute period.

- The new site approval process with accompanying datasets was developed to comply with the new requirement and site assessment form supplied in the revised guideline.
 - In 2025, 121 PGZ sites and 94 ISD site locations were approved by EPS.
 - Prior to 2025, the site assessment for each site, outlining the reason and criteria for selection and approval was posted at edmonton.ca/enforcement through the [Safe Streets Map](#). Because the City no longer conducts MSE, sites are no longer shown on the map.
- In 2024, a total of 280 automated enforcement sites were renewed, including 179 MSE sites and 101 ISD locations.

AUTOMATED ENFORCEMENT SUMMARY

ATE is deployed in Edmonton at approved sites in accordance with the Automated Traffic Enforcement Technology Guideline set out by the Province of Alberta. The City's automated enforcement program is delivered and managed by the Safe Mobility Section within the City Operations Department with oversight and direction from the EPS. At the start of 2025, the program consisted of Mobile Photo Enforcement, which are photo radar and photo laser units that move among active enforcement sites, and ISDs, which are deployed at fixed locations. Refer to the timeline image above for details on when program changes occurred during the year.

Please find below a summary of the outcomes of the City of Edmonton's automated enforcement program for 2025, prepared by the City of Edmonton Safe Mobility Section.

MOBILE SPEED ENFORCEMENT

The City of Edmonton operated seven photo radar units and three photo laser units to enforce speeding violations at approved automated enforcement sites in 2025.

Significant efforts have been made to ensure that the City's automated enforcement program is transparent and focused on safety. The City makes ISD location and site assessment information publicly available on the [Safe Streets Map](#). MSE vehicles featured bright yellow wraps or decals to be more visible to drivers and were parked so that they can be seen without obstruction by the direction of traffic they are monitoring.

The deployment of available automated enforcement visits across PGZ sites was carried out through the application of an optimization tool designed by the University of Alberta. The tool considered several factors for each site and provided the optimal distribution of visits to maximize the safety impact. The factors considered by the deployment tool for each site included:

- Frequency and severity of crashes
- Frequency and severity of vulnerable road user crashes
- Speed compliance rates
- Number of speed complaints filed by residents
- Number of children and seniors in the area
- Historical violation rates

Mobile Speed Enforcement General Statistics

To assess the impact of MSE, traffic flow data, violation rates, ticket numbers and crash data for 2021 to 2024 were gathered for each site, as provided in [Appendix 1](#). General statistics for the mobile photo enforcement program are summarized in Table 1 below.

There are a number of key highlights related to the performance and outcomes of the mobile speed enforcement program in 2025.

- There were large decreases in the number of sites visited and hours of enforcement compared to 2024, due to changes in enforcement based on the Automated Traffic Enforcement Technology Guideline (2025).
- The ticket conversion rate in 2025 (i.e., number of violations that result in the issuance of a ticket) was lower than in previous years due to postal interruptions in May and June. Photo radar tickets were not issued during this time after the Government of Alberta directed law enforcement agencies to pause the mailing of photo radar tickets due to a Canada Post labour dispute.
- There was an overall increase in the violation rate (number of violations per hour of enforcement) compared to 2024.
 - Areas outside of PGZs:
 - The violation rate increased by 25% in 2025 (compared to a 3-year average between 2022-2024).
 - Sites were only enforced in January 2025.
 - Areas within PGZs:
 - The violation rate increased by 60% in January - April 2025 (compared to a 3-year average for those same months in 2022-2024). Only these three months were used for comparison due to the ticketing interruptions in May and June.
 - Sites were enforced from January to June 2025.
- Overall, the rate of high-speed violations (i.e., number of violations greater than 20 km/h over the limit per hour of enforcement) is unchanged from 2024. However, when compared by site type (within PGZs or outside of PGZs) and time of enforcement, a different pattern emerges:
 - At sites outside of PGZs, there was an 11% increase in the high-speed violation rate for January 2025 compared to January enforcement in the three previous years. This increase comes despite a 42% decrease in enforcement hours along high-speed roadways (70 km/h or greater).
 - In PGZs, there was a 35% increase in the rate of high-speed violations compared to January-to-April enforcement over the past three years.

Table 1. Mobile Speed Enforcement General Statistics (2022 - 2025)

	Year	2022	2023	2024	2025 (Partial Year)
MONITORED	Total Sites Visited ²	475	422	420	311
	Total Hours	54,749	56,203	57,857	11,243
	Number of Vehicles Monitored ³	8,493,072	22,489,100	24,714,884	2,703,955
	PGZ Sites Visited	262	278	288	239
	PGZ Hours	13,313	17,764	21,247	8,834
SPEED	Total Violations ⁴	139,491	165,300	117,653	28,267
	Total Tickets ⁵	113,248	135,442	94,288	17,359
	Ticket Conversion Rate	81.2%	81.9%	80.1%	61.4%
	Violations per Hour	2.55	2.94	2.03	2.51
HIGH SPEED (21+)	High Speed Violations 21+ km/h Over the Speed Limit	21,691	27,918	12,549	2,509
	Total Speeding Tickets 21+ km/h Over the Speed Limit	16,787	22,256	9,182	1,437
	Violations per Hour	0.40	0.50	0.22	0.22
PLAYGROUND	PGZ Violations	22,916	25,320	33,252	24,025
	PGZ Tickets	20,014	21,274	28,750	14,376
	Violations per Hour	1.72	1.43	1.56	2.72
REPEAT	Number of License Plates Receiving Multiple Tickets	13,227	17,492	10,108	852
	Maximum Number of Tickets per 1 License Plates	18	20	20	9

As seen in Table 1, above, there was a large decrease in the number of enforcement hours in 2025. As a result of changes to the Automated Traffic Enforcement Technology Guideline in 2025, the City of Edmonton discontinued enforcement at non-PGZ sites as of January 31,

² In 2023, there was a decrease in the number of sites visited (compared to 2022) as some sites were deactivated due to the site criteria specified in the 2021 Automated Traffic Enforcement Technology Guideline, as well as roadway and LRT construction impacting the ability to actively enforce those areas. No new sites were added due to a Provincial moratorium on creating new sites.

³ There was a process change related to tracking vehicles monitored. In 2023, some equipment was upgraded to ensure that all passing vehicles were monitored, in accordance with Provincial Guidelines. The increase in vehicles monitored between 2022 and 2023 reflects this change in process and equipment.

⁴ A violation is defined as a vehicle captured exceeding the threshold speed on a given roadway.

⁵ A violation results in a ticket only following a thorough review process whereby a determination is made to issue a ticket to the registered owner of the offending vehicle.

2025. Enforcement of PGZ sites was discontinued by the City of Edmonton as of June 30, 2025.

In order to provide a more accurate year-to-year comparison, Tables 2 and 3 below show 2025 MSE statistics compared to the same timelines in previous years. Table 2 shows statistics from January only from 2025 and previous years in non-PGZ enforcement sites. Table 3 shows statistics from January to April for PGZ enforcement sites. Although enforcement continued through May and June, those months have been excluded from this analysis due to postal interruptions during those months which affected the issuance of tickets.

Overall, the City observed increases in the violation rate (violations per hour of enforcement) and the high-speed violation rate (violations at least 21 km/h over the limit per hour of enforcement) in both in PGZs and outside of PGZs. The increased violation rate within PGZs (Table 3) was more pronounced than outside of PGZs (Table 2). One possible explanation for this difference was that more enforcement hours were spent in 2025 at PGZ sites with high violation rates⁶. There was a 26% increase in enforcement hours spent at these sites from 2024 to 2025 (comparing January through April hours only for both years).

Table 2. Mobile Speed Enforcement Statistics for January in Enforcement Sites outside of Playground Zones (2022-2025)

	January 2022 - 2024 (Average)	January 2025
Total Sites Visited	115	72
Total Hours	3,050	2,408
Number of Vehicles Monitored	1,148,542	1,525,640
Total Violations	4,289	4,242
Total Tickets	3,051	2,983
Ticket Conversion Rate	70.9%	70.3%
Violation Rate (Violations per Hour)	1.41	1.76
High Speed Violations 21+ km/h Over the Speed Limit	526	462
Total Speeding Tickets 21+ km/h Over the Speed Limit	360	298
Violation Rate (Violations per Hour)	0.17	0.19

Table 3. Mobile Speed Enforcement Statistics for January to April in Playground Zones (2022-2025)

	January - April 2022 - 2024 (Average)	January - April 2025
Total Sites Visited	224	233
Total Hours	5,679	6,451
Number of Vehicles Monitored	445,754	832,697

⁶PGZs with high violation rates were defined as those sites that were in the top 25% of PGZs with the highest number of violations in 2024.

Total Violations	8,106	15,073
Total Tickets	6,924	12,900
Ticket Conversion Rate	85.6%	85.6%
Violation Rate (Violations per Hour)	1.46	2.34
High Speed Violations 21+ km/h Over the Speed Limit	766	1,210
Total Speeding Tickets 21+ km/h Over the Speed Limit	622	1,023
Violation Rate (Violations per Hour)	0.14	0.19

An alternative method to compare year-to-year statistics is by looking at sites that were visited in both 2024 and 2025 to see changes in those sites over time. Table 4 below illustrates the impact of MSE on speeds, traffic volumes and violations. In 2024 and 2025, MSE was deployed to the same 310 sites for at least one hour, with 238 of the sites being in PGZs and 72 along roads with speed limits ranging from 50 km/h to 90 km/h.

PGZ sites showed increases in some speeding indicators, including an increase of 0.48 violations per hour and a 0.6% decrease in the average compliance rate. The average speed at PGZ sites decreased by 0.09 km/h.

The sites outside of PGZs showed decreases in speeding indicators, including a decrease in 0.33 violations per hour, a 0.67 km/h decrease in average speed, and a 0.4% increase in the average compliance rate.

Table 4. Changes in Speeds, Traffic Volumes and Violations at Mobile Speed Enforcement Sites from 2024 to 2025.

	PGZ	Other⁷
Number of MSE Sites in Both 2024 and 2025	238	72
Average Change in Monitored Vehicles per Hour	+9.2	+11.2
Average Change in Violation Rate	+0.48	-0.33
Average Change in High Speed Violation Rate	+0.05	-0.04
Average Change in Average Traffic Speed	-0.09 km/h	-0.67 km/h
Average Change in Compliance Rate⁸	-0.6%	+0.4%

Interpreting Crash Statistics

In September 2022, Collision Reporting Centres (CRCs) were launched in Edmonton, which marked a significant change in the crash data collection and reporting process for residents as well as for how collision data is managed and reported. This change has impacted collision data and data availability and reporting in two ways:

- The number of minor injury crashes reported since 2023 has increased greatly compared with previous years, due to the self-reported nature of collisions and kiosk

⁷ Includes sites outside of PGZs that were enforced in both 2024 and 2025 for at least one hour.

⁸ Compliance Rate is the percentage of vehicles travelling at or below the speed limit.

questions at CRCs. Collision report data from CRCs differs in consistency and accuracy from the data previously received from EPS.

- There have been increased delays in receiving collision reports processed through the CRCs. As a result, not all 2025 crash data has been finalized to date.

Because 2025 crash reports are still being received and entered at the time of submission of this report, it is difficult to assess the change in crash numbers; however, the first quarter (Q1, January 1 - March 31) of 2025 and previous years have been provided to show a comparison between years. Table 5 below shows a comparison between Q1 data for 2022-2024 (yearly average) and Q1 for 2025.

Preliminary analysis shows a decrease in the total number of crashes at automated enforcement sites, comparing Q1 of 2025 to the three year average of crashes in Q1 for 2022-2024. There is little change in the number of crashes resulting in serious injuries and fatalities.

As indicated in the Municipal Traffic Safety Expansion Opportunities report (CO03044) presented to City Council on December 1, 2025:

Fatality rates have been rising rapidly since 2023 (24 in 2023, 26 in 2024 and 30 from January - November 2025). Serious crashes are increasingly tied to risky driver behaviours, including speeding, impairment and distraction. Speed and red-light violation data confirm these patterns.

Although the total number of collisions in Edmonton has decreased since Vision Zero was adopted in 2015, the proportion of those collisions resulting in fatalities and major injuries has increased.

Table 5. Crash statistics for Mobile Speed Enforcement Sites

Crash Type	2022-2024 (Yearly Average)	2025 ⁹ (incomplete year)	2022-2024 (Q1 Average)	2025 ⁹
	Annual Data		Quarter 1 only (January - March)	
Total Crashes	880	352	226	168
Fatal Crashes	1	0	0	0
Major Injury Crashes	14	12	3	4
Fatal and Major Injury Crashes	15	12	3	4

⁹ 2025 crash numbers are subject to change due to delays in receiving and finalizing reports. Total crash numbers for 2025 are based on those received and validated by City staff as of the publication date of this report (May 1, 2026)

INTERSECTION SAFETY DEVICES

ISDs were active at 89 locations/approaches (64 intersections) for some portion of 2025 to enforce red light running.

Intersection Safety Device Statistics

In order to assess the impact of ISDs, traffic volume data, violation rates, ticket numbers and crash data for 2022 to 2025 were gathered for each site, as provided in [Appendix 2](#). General statistics for (ISDs) are summarized in Table 6.

Table 6. ISD Sites General Statistics (2022-2025)

	Year	2022	2023	2024	2025 ¹⁰
MONITORED	Total ISD Days ¹¹	35,954	33,253	32,120	30,108
	Number of Vehicles Monitored	479,328,213	467,620,678	464,729,835	459,737,182
	Vehicles Monitored per ISD Day (Daily Traffic) ¹¹	13,332	14,063	14,469	15,270
RED LIGHT	Total Red Light Violations ¹²	67,465	48,936	58,073	64,946
	Total ISD Red Light Tickets ¹³	32,201	22,706	31,345	34,351
	Red Light Violation Conversion Rate	47.73%	46.40%	53.98%	52.89%
	Red Light Tickets per Daily Traffic	2.42	1.61	2.17	2.25
REPEAT	Number of License Plates Receiving Multiple Red Light Tickets	1,445	848	1,435	1,982

Figure 1 below shows year-over-year trends in the number of red light tickets issued and traffic volumes at ISDs. Red light violations are variable and tend to be highly affected by weather conditions, such as snowy, icy roads. There was a high number of red light violation tickets in 2022, which could be attributed to higher than average snowfall in January and

¹⁰ 2025 crash numbers are subject to change due to delays in receiving and finalizing reports.

¹¹ Daily traffic is measured by the number of vehicles monitored for each day that an ISD is active (or ISD Day). For example, if five ISDs are active for ten days each, that would equate to 50 "ISD days" and the total number of vehicles measured at all five ISDs would be divided by 50.

¹² A violation is recorded when a vehicle is captured exceeding the threshold speed or running a red light on a given roadway.

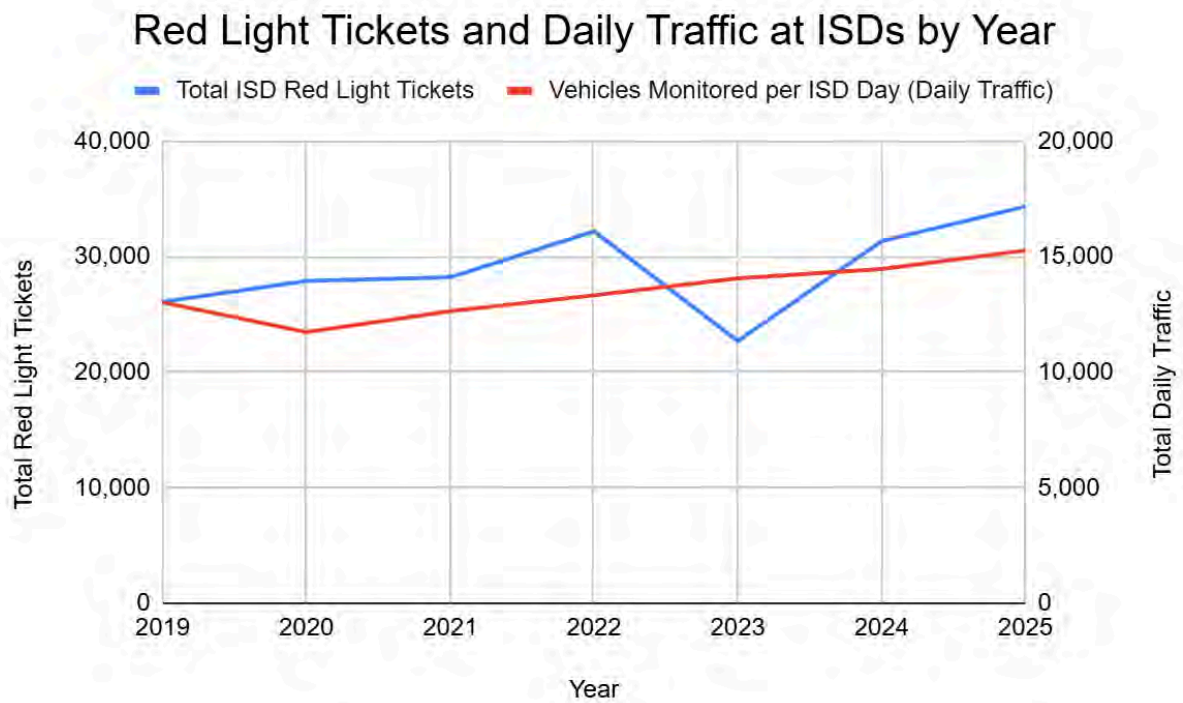

¹³ A ticket is issued for a violation after undergoing a comprehensive review process and a determination is made to issue a ticket to the registered owner of the offending vehicle. Reasons why a violation may not result in a ticket include right turn on red, larger length vehicles, emergency vehicles with lights flashing, and snow or other objects obstructing license plate visibility.

November of that year. In contrast, there were fewer red light tickets in 2023, which could be attributed to lower than average snowfall in January, November and December of 2023.

Red light tickets in 2025 increased by 9.6% compared to 2024, reaching a five year peak. Additionally, the number of drivers receiving more than one red light ticket in 2025 increased by 38% compared to 2024. Overall, daily traffic increased by 17.2% since 2019, whereas red light tickets increased by 31.6% during that time.

An analysis of ISDs that were active in both 2024 and 2025 showed that the average red light violation rate per site increased by 1.7 violations per 100,000 vehicles.

Figure 1. Number of Red Light Violation Tickets and the Number of Vehicles Monitored per ISD day, from 2019-2025.

Interpreting Crash Statistics

Tables 7 and 8 provide the crash statistics at ISD locations for both the full intersection and the monitored direction of travel, respectively. Comparing Q1 of 2025 to a three year average of Q1 (2022-2024), there has been a decrease in the total number of crashes, both for the full intersection and monitored directions, but an increase in fatal and major injury crashes. This increasing severity of crashes reflects a city-wide pattern.

Table 7. Crash Statistics for ISD Sites (Intersections)

Intersection Crashes	2022-2024 (Yearly Average)	2025 ¹⁴ (incomplete year)	2022-2024 (Yearly Average)	2025 ¹⁴
	Annual Data		Quarter 1 only	
Total Crashes	2,646	1,164	735	498
Fatal Crashes	1	4	0	1
Major Injury Crashes	30	30	4	5
Fatal & Major Injury Crashes	31	34	4	6

Table 8. Crash Statistics for ISD Sites (Through Lanes)

Intersection Through Lane Crashes	2022-2024 (Yearly Average)	2025 ¹⁵ (incomplete year)	2022-2024 (Yearly Average)	2025 ¹⁵
	Annual Data		Quarter 1 only	
Total Crashes	834	411	234	168
Fatal Crashes	1	1	0	1
Major Injury Crashes	9	11	1	1
Fatal & Major Injury Crashes	9	12	1	2

AUTOMATED ENFORCEMENT TARGETS

The automated enforcement program’s 2025 Traffic Safety Plan tracks three performance measures for the automated enforcement program which are:

- Repeat violators: the percentage of license plates that had at least one ticket from the current quarter and had at least one ticket in the past year. A decrease in the percentage of repeat violators would suggest that receiving a ticket may be effective

¹⁴ 2025 crash numbers are subject to change due to delays in receiving and finalizing reports. Total crash numbers for 2025 are those received and validated by city staff as of the publication date of this report (May 1, 2026)

¹⁵ 2025 crash numbers are subject to change due to delays in receiving and finalizing reports. Total crash numbers for 2025 are those received and validated by city staff as of the publication date of this report (May 1, 2026)

- in changing a driver's behaviour, despite the delay between the behaviour and receiving the ticket.
- High speed violations: the percentage of total violations that exceed 21+ km/h over the speed limit. A decrease in high speed violations would indicate that fewer drivers are travelling at excessive speeds.
 - Location impact: the percentage of total deployment hours spent conducting enforcement at high injury network sites. The City's high injury network includes streets and intersections where crashes and traffic-related serious or fatal injuries have occurred more frequently over the last several years and is publicly available on the [Safe Streets Map](#). The City uses this information to prioritize improvements, identify high risk areas, and create solutions to make our streets safe for all Edmontonians.

Table 9 illustrates the City of Edmonton's performance on the two relevant measures defined above against the targets for each measure.

Table 9. Automated Enforcement Performance Measures

Performance Measures	Repeat Violators ¹⁶	High Speed Violations (PGZs) ¹⁷
Target	Less than 43% ¹⁸	Less than 6.4% ¹⁹
Q1 2025	30.7% - On Target	7.9% - above target not applicable
Q2 2025	28.3% - On Target	9.0% - above target not applicable
Q3 2025	23.9% - On Target	n/a
Q4 2025	16.3% - On Target	n/a

AUTOMATED ENFORCEMENT REVENUE

The City's automated enforcement program generated \$7.951 million in 2025. As outlined in [City Policy C579B Traffic Safety Automated Enforcement Reserve](#), automated enforcement revenue generated by the program is reinvested back into Safe Mobility initiatives such as crosswalk upgrades, adaptable traffic calming installations and other road design improvements to help reach Vision Zero.

OTHER TRAFFIC SAFETY INITIATIVES

Projects and programs to encourage safe speeds are a significant focus for the City of Edmonton. Guided by a Safe System approach, the City combines automated enforcement with engineering, education and other measures to improve safety city wide. Learn more at edmonton.ca/VisionZero.

¹⁶ Repeat violators were calculated based on the percentage of drivers issued a red light ticket who had previously received a red light ticket within the past year.

¹⁷ High Speed violations for 2025 were calculated based on the number of violations within PGZs, divided by the total number of violations in PGZs per quarter.

¹⁸ Original target based on all ticket types, including red light and speeding tickets.

¹⁹ Original target based on all speed enforcement locations (PGZs and non-PGZs)

Speed Check Signs

The City of Edmonton uses Speed Check Signs (SCS) to share vehicle speed information with drivers and alert them to when they are speeding. In 2025, there were 258 active SCS deployed across the city on major roadways, in neighborhoods and near playgrounds. In addition, portable SCS are available upon request. The total number of requests for portable SCS honoured in 2025 was 503.

The City of Edmonton's Research Chair in Urban Traffic Safety at the University of Alberta, conducted research on the effectiveness of SCS use on different roads and intervention types. Results showed significant crash reductions in all scenarios ranging from 31.0% to 41.6%. SCS were more effective in reducing crashes along arterial roadways as compared to collectors. Also, the combined use of SCS and mobile photo enforcement had a slightly higher impact on safety.²⁰

Speed Limit Reduction

Speed limit reduction is a *Key Action* outlined in the *Safe Mobility Strategy*, reflecting the fact that speed is a factor in every crash. In alignment with the internationally recognized evidence on the relationship between speed and traffic fatalities and serious injuries, Edmonton implemented a reduction in the default speed limit from 50 km/h to 40 km/h in 2021. Areas of focus for speed limit reduction included residential streets, the downtown core and high pedestrian areas.

A comprehensive evaluation of the speed limit reduction initiative was conducted and found statistically significant reductions in speeds and crashes including serious crashes. In collaboration with the University of Alberta, a research study detailing the outcomes of the evaluation, entitled "*Assessing the effectiveness of speed limit reduction in Edmonton: A case study analysis*"; was previously published in the prestigious academic journal, *Accident Analysis and Prevention*.²¹

Slowing down gives people more time to react to the unexpected to prevent crashes and reduce the severity of collisions that do happen. The interactive [Speed Limit Map](#) tool is available to help people understand which roads have lower speed limits.

Speed reduction safety improvements continued in 2025 through several engineering projects, as described below.

Engineering

The City proactively builds new streets and upgrades existing streets with design features that are intended to prevent crashes or reduce the severity of outcomes when crashes occur. This includes designing and implementing measures to reduce speeds such as speed

²¹ Abohassan, A., Contini, L., Elmasry H., El-Basyouny, K., 2023. Assessing the effectiveness of speed limit reduction in Edmonton: A case study analysis. *Accident Analysis and Prevention*, 195. <https://www.sciencedirect.com/science/article/abs/pii/S0001457523004268?dgcid=author>

humps, speed tables, raised crosswalks, two-stage crossings and curb extensions where appropriate for the type of road.

The **Towards 40 Program** is focused on improving safety in areas where speeding and road safety issues have been identified. The program is designed to increase speed limit compliance and encourage safe driving behaviours using adaptable measures to improve safety.

The **Speed Humps and Tables Program** installs speed humps or speed tables along priority corridors where there is a need to encourage safer speeds.

The City of Edmonton continuously works to improve safety around schools, along priority corridors and at priority crossings:

The **Safe Routes to School Program** serves to further improve safety along the routes to schools beyond the immediately surrounding roads, and increase safety around playgrounds and park spaces frequented by local residents.

In 2025, Safe Mobility established a new **Playground Zone Safety plan** which included a dedicated role supporting schools and school boards and increased coordination internally and externally. Through this plan, two pilot projects were implemented including:

- **Highlands School:** This pilot project involved installing countermeasures (speed check signs, flashing beacons, pavement markings and flex posts) to reduce the speed limit to 30 km/h on the arterial road in front of Highlands School during times with peak pedestrian volumes. This pilot project was successful in reducing speeds:
 - When lights were flashing (before and after school and at lunch time), average speeds were reduced by 14% in both eastbound and westbound directions.
 - Average speeds decreased by 5% overall at all times of the day. Speed limit compliance for drivers in both directions is now over 79%, with westbound traffic showing a large increase (19.5%).
- **St. Thomas Aquinas School:** Safety measures were installed to prevent illegal parking in no stopping and no parking zones, improving the safety of students travelling to and from school.
 - After the measures were installed, parking enforcement experienced a 67% decrease in tickets issued per visit as well as a 56% decrease in no stopping violations.

Vision Zero Street Labs is a program designed to address traffic safety concerns at the neighbourhood level. This program uses adaptable traffic calming measures on residential and collector roads to address traffic safety concerns. Deploying these adaptable measures allows the City to trial traffic safety solutions in a timely and effective manner with the ability to make adjustments as needed. Each Street Lab is tailored to the unique needs of the community in order to creatively address problems such as speeding, shortcutting and other unsafe driving behaviours. Adaptable measures include:

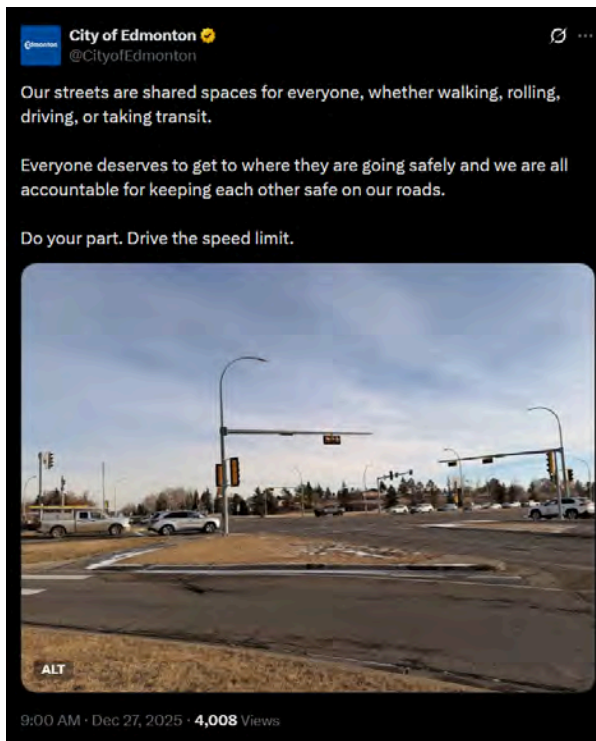

- Curb extensions
- Two-stage crossings
- Centre medians
- Adaptable speed humps
- Adaptable traffic diverters
- Adaptive sidewalks

Education and Community Activation

Lower speeds translate into fewer crashes, injuries and fatalities on our streets and afford greater protection to our most vulnerable road users including pedestrians, cyclists, users of micromobility, seniors and children and therefore constitute a critical factor in creating a safe system for all people.

Shifting public understanding and expectations as to what constitutes safe and acceptable speeds will further contribute to a larger, more transformational shift in traffic safety culture and help us reach the goal of Vision Zero.

From November 28 through December 30, 2025, the City of Edmonton held a one-month social media education campaign (see example post below) to help raise awareness of the importance of driving the speed limit. This campaign also highlighted high-collision intersections for location-specific awareness.

Operation 24 Hours is a high-visibility enforcement campaign coordinated with EPS, to reduce speed and other traffic violations. In 2025, Operation 24 Hours events were held in April, May, September and October.

CONCLUSION

The City continues to support safe speeds and road user safety on Edmonton's streets through the *Safe Mobility Strategy*, which serves as an essential tool in combination with educational and engineering programs. The City of Edmonton is proud of the achievements made towards safer and more livable streets.

The City is committed to ensuring that its automated enforcement program is in compliance with the Government of Alberta's Automated Traffic Enforcement guidelines, available via alberta.ca/photo-radar-alberta.

APPENDICES

Appendix 1. Mobile Speed Enforcement data for each site active between 2022 and 2025, including:

- Deployment hours
- Violations
- High speed violations
- Tickets
- High speed tickets
- Traffic monitored
- Average speed
- Total crashes
- Fatal crashes
- Major injury crashes
- Injury crashes
- Property damage crashes
- Traffic injuries and fatalities

Appendix 2. Intersection Safety Device data for each site active between 2022 and 2025, including:

- Number of days active
- Red Light violations
- Red Light tickets
- Traffic monitored
- Average speed
- Crash data for full intersection and monitored direction
 - Total crashes
 - Fatal crashes
 - Major injury crashes
 - Injury crashes
 - Property damage crashes
 - Traffic injuries and fatalities
