DRAWING SET NOTES

The Low Pressure Plant was 2D drafted and 3D modelled in Revit 2020 using data from a variety of sources. The primary source of data was MiraCAD LiDAR scan data from September 16, 2020 and October 23, 2020. A point cloud was generated through terrestrial LiDAR scan data combined with aerial drone photogrammetry. Additional data for the Low Pressure Plant drawing set was gathered from DFS photography, MiraCAD photography, EPCOR's Rossdale Generating Station (RGS) drawing database, and CADMapper.

Accuracy: 50 mm
Level of Development (LOD): 100

Missing Data from Point Cloud: Point cloud data for the East Exterior Elevation of Boiler Hall is minimal. There are also small gaps in Turbine Hall Basement, Boiler Hall Basement, and Switch House 02 - Second Floor.

Missing Data from 3D Revit Model: Structural, Mechanical, Electrical, Civil, and Landscape components have not been modelled. Concrete podiums in Turbine Hall Basement were drafted in 2D, but not 3D. Roof crickets on Boiler Hall roof and Turbine Hall have been drafted in 2D, but not 3D.

Missing Data from 2D Revit Drawings: Structural, Mechanical, Electrical, Civil, and Landscape components have not been drafted.
