Bonaventure NEIGHBOURHOOD RENEWAL

As part of the 2019 Neighbourhood Renewal Program, The City of Edmonton (Building Great Neighbourhoods) will be coordinating road construction in the Bonaventure Industrial Neighbourhood.

Construction is tentatively scheduled to start the week of June 10, 2019 in your neighbourhood.

Prior to the start of construction in front of the business areas, the Prime Contractor working for the City will deliver a bulletin outlining the estimated start/finish dates along with their contact information.

Please note: the duration of construction in front of your business may be up to 5 weeks (weather dependent).

SCOPE OF WORK

The construction consists of road rehabilitation or road reconstruction. Rehabilitation involves either asphalt overlay, or full-depth reclamation (in-place road recycling) and asphalt overlay. Reconstruction involves the removal of existing asphalt and road base, placement of new road base and asphalt paving. Spot concrete repairs will be performed as well. **On the back of this bulletin is a map of Bonaventure which identifies the work planned for 2019.**

ACCESS

ROAD CLOSURES: Toward the completion of each portion of the project, the roadway will be closed to traffic on selected days to facilitate road reconstruction and asphalt paving. A bulletin will be circulated to the affected businesses 5 working days prior to this work.

During construction, one lane of traffic in each direction will be maintained at all times. No parking will be permitted in signed areas. Areas affected by road reconstruction will not have vehicular access to the street. One point of access to businesses and alleys will be maintained, where possible, at all times. Emergency access will be maintained at all times. All businesses are asked to access their areas through alternate accesses where possible during construction. ***If you have special access requirements, such as DATS, please contact the Project Manager to coordinate access.***

For information about what to expect during construction please contact:

Mr. Terrence Gosine, P.Eng.
